

INTERNAL MEDICINE CLERKSHIP SITES

Huntington Memorial Hospital

Huntington Memorial Hospital is a community hospital with an active internal medicine teaching program. Residents and senior medical students care for non-private patients under the direct supervision of attending physicians. A committed teaching staff supervises the residents and medical students on the medicine service. A multitude of consultants are available. The American Board of Internal Medicine certifies all of the members of the teaching staff, and many are certified in a subspecialty area. The members of both the part-time and full-time teaching staffs are dedicated, responsible, and skilled physicians whose enthusiasm is vital to the ongoing success of our teaching program.

Los Angeles General Medical Center

Los Angeles General Medical Center is situated on the USC Health Sciences Campus near Metropolitan Los Angeles. This state-of-the-art medical center enables the staff to provide our students and residents with a remarkably rich and diverse training environment. Our students work under the supervision of residents and full time faculty in the department of Medicine. The scope of clinical pathology seen by USC medical students and residents (both common and rare) is truly unrivaled in the United States. In addition, our institution serves as a tertiary and quaternary referral center for the region, nation and in deed the world.

Santa Barbara Cottage Hospital

Santa Barbara Cottage Hospital is a community hospital with an active internal medicine teaching program. Residents and fourth-year medical students care for both private and non-private patients under the direct supervision of attending physicians. A large, voluntary teaching staff attends the private patients; the non-private patients are attended by three institutionally based physicians. A multitude of consultants are available for either private or non-private patients.
